

Algorithmic Robotics

COMP/ELEC/MECH 450/550

Homework 0

For this warm-up assignment, you need to:

- Find a YouTube video (or an article if you cannot find a video) of an interesting robot or an interesting accomplishment using robotic technology. Submit the URL.
- Write a two paragraph explanation about the robot shown in the video (e.g., Who made this robot? What is this robot used for? How does this robot work? Why is this video interesting to you?)

You will eventually present your chosen robot to the class. We will show the video, and you will explain why you chose this robot.

Submit a single page document as a PDF file in 11pt font with the URL of the video and your explanation to the Canvas page of the assignment. Anything that is not a PDF document will **NOT** be accepted in this class (e.g., word documents in the *.doc, *.docx, or *.odf formats).

Due by the beginning of class (1pm) on Thursday, August 24th, 2023.
